PROFILE SUMMARY

Unity Developer with 3 years of expertise in multiplayer systems, cross-platform game development, and AR/VR using C# and Unity. Skilled in Photon Fusion, Netcode, PlayFab, and performance optimization, delivering high-quality, scalable games for PC, mobile, and WebGL platforms.

WORK EXPERIENCE

Game Developer | 2023 –present

Devsinc

- Developed and **optimized** gameplay systems and UI/UX features across Windows, Android, WebGL, iOS, **VR/AR**.
- Built multiplayer architecture with **Photon Fusion** and integrated backend services using **PlayFab**, **Azure**, and **Firebase** for authentication, cloud saves, and analytics.
- Implemented **Blockchain** solutions for WebGL and Android, including **wallet integration**, **smart contract interaction**, **NFT** data fetching, and **Pinata/IPFS** storage via GraphQL.
- Bridged Unity to **JavaScript** for browser scripting and Unity to **Java** for native Android functionality.
- Optimized performance, reduced load times, and ensured cross-platform stability through **profiling**, memory management, and clean C# coding practices.
- Collaborated** with designers and developers, mentoring juniors, contributing to **CI/CD pipelines**, and maintaining scalable project architecture.

PROJECTS

Shiba Eternity (Mid Core)

- Players collect and battle strategic NFT cards across Android, iOS, and WebGL platforms.
- Utilized **Azure cloud scripting** and **PlayFab** for backend services including leaderboards and multiplayer management with **Photon PUN2**.
- Implemented **Factory** and **Observer** patterns to maintain clean, modular, and scalable code.
- Integrated wallet connectivity with **Web3.js** and smart contract interactions for full NFT and **blockchain** support.

Sacred Tails (Mid Core)

- Built a modular **quest system** with dynamic objectives and progression tracking.
- Integrated **PlayFab** leaderboards and fetched NFT assets from Pinata/IPFS via **Graph** for blockchain-enabled gameplay.

Workspace (MetaVerse)

- Developed a WebGL **metaverse** with real-time player movement using **Photon Fusion** and **Agora voice chat**.
- Built a custom **Node.js** server deployed via **Ngrok** to send/receive **Slack** messages seamlessly inside the **WebGL** app.

EDUCATION

PUCIT | 2019 – 2023

Bachelor of Science in Information Technology

CERTIFICATES

- Summer Internship from MindStrom Studios
- Professional communication and Soft Skills Fellowship from Amal Academy
